ABOUT ME

I have accumulated 18 years of experience working in a casino, from a croupier to a shift manager position. Six months ago, after our branch in Klaipėda closed, I decided to try something that had interested me for a long time – programming. After successfully completing the **Vilnius Coding School JavaScript Full-Stack** course, I realized that I would like to develop my career as a junior programmer. Therefore, I am currently open to new career opportunities in the programming field.

TECHNICAL SKILLS

- Create interactive and dynamic functionality using JavaScript
- Build the website structure using HTML
- Design the website using CSS and various CSS frameworks
- Use CSS preprocessors for more efficient styling
- Use React.js
- Create and manage databases using MongoDB
- Work with Node.js
- Version control code using Git
- Familiar with various software testing methods
- Agile methodology

EDUCATION

Long JavaScript "Full-Stack" training
Vilnius Coding School

May 28, 2024 - August 22, 2024, 12 weeks, 492 hours.

I gained strong fundamentals in web development: I learned to create website structure using HTML, style the website using CSS and CSS frameworks, make it dynamic with JavaScript and React.js, work with databases using MongoDB, program on the server side with Node.js, version code using Git, apply various software testing methods, and work according to Agile methodology.

Link to final work: github.com/dgenutis
